Subject: Chugach ERO Filings

Jean,

I'm completing my review of the Chugach ERO filings (it's been a busy summer) and am hoping you might be able to provide some information on why the calculation of the surcharge was not spelled out on the proposed tariff sheet. I am a little concerned about future confusion if the calculation is not included somewhere with more permanence than an exhibit. Is this a change Chugach would be willing to entertain?

Thanks,

Claire

Chugach Electric Association, Inc.

ELECTRIC RELIABILITY ORGANIZATION SURCHARGE

N

The electric reliability organization (ERO) is a statutorily created entity that is responsible for developing and enforcing reliability standards and transmission interconnection standards as well as conducting integrated resource planning for the Railbelt electric system. The ERO recovers its costs associated with those activities from load serving entities (LSE) like Chugach that are located within an interconnected bulk-electric system served by the ERO. Any LSE that is subject to the ERO cost-recovery surcharge may also implement a separate charge on its bills to retail customers to recover costs it incurs through payment of the ERO's surcharge. This tariff sheet contains the terms, conditions, and charges associated with Chugach's recovery of the ERO related costs described above.

A. Applicability

The ERO surcharge is applicable to Chugach Retail Members.

B. ERO Surcharge Balance Account

Chugach shall maintain a balancing account to reflect its LSE share of allocated costs and the amounts recovered through the surcharge. The balancing account reflects the sum of the debit and credit entries described as follows:

- 1) A debit entry equal to the actual total ERO costs for each month of the prior year;
- 2) A credit equal to the surcharge collected from Members by the Association each month of the prior year;
- 3) Debit or credit entries for relevant adjustments and accrual/reversals for entries described in (1) and (2) above for prior period(s).

C. ERO Surcharge

The surcharge rate will be adjusted annually to reflect changes in the cost allocation amount as adjusted by balancing account balances and divided by projected retail sales for the recovery period. Chugach reserves the right to revise the rate more frequently if necessary.

ERO Surcharge: \$0.00090 per kWh
